## **President Espinosa and Members of the Board**

The 2011-2012 Final Budget for the Chino Valley Independent Fire District is hereby presented to the Board of Directors. The development of this budget was guided by the District's Master Plan, District goals and the District's Long Range Financial and Human Resources Plans. The Budget has been developed to ensure that the District maintains the high quality and cost effective level of fire protection and emergency services it has historically provided to the Chino Valley.

## **Financial Overview**

This Final Budget represents a solid financial plan for the 2011-12 fiscal year. Although a transfer from Fund Balance will be necessary to balance the budget, the District has accumulated sufficient operating reserves to offset short term economic downturns. Significant efforts have been undertaken at all levels of the organization to cut projected expenses when possible. Final Budget includes a reduced level of expenditures in comparison to the Preliminary Budget. The audited fund balance, and final revenues and expenditures for the year ending June 30, 2011, will be presented in conjunction with completion of the annual audit in late 2011.

## **Plan Highlights**

The short-term goals of the District's various planning efforts have been reflected in the 2011-12 Final Budget, where appropriate. Major budgetary initiatives in '11-12 include the staffing of new Fire Station 7 at Ross and Riverside Avenues in the City of Chino, the District's first new engine company since the opening of Fire Station 4 in the Carbon Canyon area of Chino Hills in 1991. With the opening of the new station, daily staffing levels of fire personnel have increased from 29 to 33, thereby significantly enhancing the level of emergency response services available to the community. And while capital expenditures have generally been deferred to future years when possible, the District's current breathing apparatus is beyond its useful life and is budgeted for full replacement in '11-12. Additionally, the replacement of the District's enterprise resource computer system is well under way and will be completed in phases in '11-12.

## **Revenue Highlights**

Revenue related to property valuation represents over 90% of the District's revenue stream, and is derived from two sources. The first source is direct payments from property tax receipts that are distributed by the County. The second is through a contract with the City of Chino to ensure an equitable provision of revenue based upon assessed valuation throughout the District.

Property tax-based revenues are projected to increase at a modest rate in '11-12 of just under 1% over '10-11, as the economic downturn continues to impact assessed real estate values in the area. Additionally, also included in the Final Budget is the fiscal impact of the termination of dispatch reimbursement by the City of Chino, commencing September 1, 2011. As per the terms of the agreement with Chino, dispatch reimbursement was to terminate the first of the month following the month in which a Certificate of Occupancy (COP) was issued for either of the new fire stations under construction by the City. Station 7 received its COP in August, 2011.

Total revenues for 2011-12 are projected to decrease about 2.5% over 2010-11 budget levels.

## **Expenditure Highlights**

Expenditures are classified into three major areas: Salaries and benefits, services and supplies, and capital outlay. Expenditures are further separated among Divisions: Administration, Operations and Prevention.

The salaries and benefits portion of the expenditure budget assumes full staffing, and includes staffing for new Station 7, beginning in late July. Total operating expenditures for 2011-12 are projected to increase by about 3% over 2010-11 levels, primarily due to the opening of the new fire station, and well as due to general increases in PERS retirement rates in '11-12. When prudent to do so, expenditures have been reduced in other areas in an attempt to mitigate the effects of these labor cost increases.

As approved by the Board in July, Final Budget includes the fiscal impact of the payoff of the District's PERS Side Fund obligations. This one-time expenditure is broken out separately from regular operating and capital expenditures on the Budget Summary page of Final Budget, and is being funded through a transfer from Fund Balance. It is projected that the payoff of this obligation will result in savings of up to \$3.1 million in future PERS payments over the next sixteen years, including about \$428,000 in immediate savings for Fiscal '11-12.

## **Summary**

This budget enables the District to maintain high quality fire and emergency response services, continuing to place a top priority on the health and safety of the public and our staff, while minimizing the need to draw on undesignated reserve funds to balance the budget. The revenue projections used are conservative and take into consideration a number of variables. Budgetary expenditures have been reduced in accordance with the lower level of revenues anticipated in Fiscal '11-12, whenever possible. The Mid-Year Budget in January will provide an additional opportunity to amend the budget, as necessary, for the balance of the fiscal year.

I am pleased to announce the opening of Fire Station 7 here in September, and I look forward to the openings of Fire Station 1 and the new Training Center in the very near future. Special thanks to the City of Chino for building these state-of-the-art fire facilities which will serve the residents of the District for generations to come. Thanks as well to the cities of Chino and Chino Hills for their continuing support of and public safety partnership with the Fire District. I would also like to extend my appreciation to the Board of Directors for the direction, support and leadership you've provided to the District. Finally, many thanks to staff for their ongoing dedication and commitment to serving our community, especially during these challenging economic times.

**Sincerely,**

A handwritten signature in cursive script that reads "Kirk Summers".

**Kirk Summers**  
**Fire Chief**

## **Chino Valley Fire District**

# **MISSION STATEMENT**

The mission of the Chino Valley Independent Fire District is to protect the lives and property of the community from the detrimental effects of fires, medical emergencies and other hazardous conditions.

# CHINO VALLEY INDEPENDENT FIRE DISTRICT

## District Overview

The Fire District is located in the southwest region of San Bernardino County. The jurisdiction of the Fire District is approximately 80 square miles in size and has an estimated current population of 166,735<sup>1</sup>. It is estimated that the Fire District population will be over 200,000 within the next 20 years. The Cities of Chino, Chino Hills, and surrounding unincorporated areas are served by the Fire District. Personnel responded to 8,948 emergency incidents last year.

The Fire District is bordered by Los Angeles County to the northwest; Orange County to the southwest; Riverside County to the southeast; the City of Ontario to the northeast and the City of Montclair to the north.

The Chino Valley community has a wide variety of development, which creates multiple fire problems. Approximately 40,000 residential units, from large single-family dwellings to apartment units, constitute the largest number of structure fires expected. This is due to the large number of residential units and the lack of ability to regulate fire safety practices in these occupancies. The major portion of emergency medical responses is anticipated to be at residential units. Approximately 20,000 additional residential occupancies are planned for, or are being constructed, through the build-out of the community.

Target hazards within the Fire District have been identified. The occupancies are considered to pose an extraordinary risk to lives and/or property. Examples of target hazards within the Fire District are a three-story, non-fire-sprinklered senior housing facility, a four-story office building and a tire manufacturing plant. Fire suppression, emergency medical, rescue and hazardous materials service is expected to be utilized at these incidents.

Over 3,400 commercial and industrial occupancies pose another type of fire problem. Current municipal planning projects the number of these occupancies to significantly increase at community build-out. In addition to the potential for large fires in these occupancies, the Fire District expects spills and airborne releases of hazardous materials. Emergency responses for medical emergencies and rescue situations are also anticipated.

Multi-story occupancies are currently limited to mid-rise structures, three-story senior housing and a four-story office building. Additional mid-rise buildings are included in community development plans. Multi-story occupancies require an extraordinarily large number of fire ground personnel to control a fire. Mutual aid from neighboring jurisdictions is necessary to control these types of fires. Due to the large number of persons occupying these types of structures, emergency medical responses are expected to be high.

There are thirty-four existing public schools in the Fire District, including two fundamental, twenty-two elementary, five junior high, five high schools, one continuing education high school and one adult school. There are currently forty-four private and pre-schools in the Fire District.

---

<sup>1</sup> Community population statistic does not include the prison populations. City of Chino – 84,964; City of Chino Hills – 75,345; Unincorporated – 6,426. Population estimates are based on information provided by the cities.

These schools are expected to have fire emergencies, as well as a high incidence of emergency medical and rescue service.

A general aviation airport owned by the County of San Bernardino lies within the Fire District. This airport had 187,649 aircraft operations in 2010 and as many as 250,000 annually in previous years. Although the County is responsible for crash-fire-rescue services at the airport, they have no resources assigned there. The Fire District provides structural fire protection and emergency medical services at the airport. Consistent with the level of training and available resources, and in the absence of County fire resources, the Fire District also provides initial response to aircraft incidents. In addition to airport fire and emergency medical needs, hazardous materials incidents are expected to occur at the airport hangar facilities.

The wildland area of the Chino Hills presents a severe magnitude fire problem. Over 14,000 acres of grass, brush and oak trees pose a seasonal fire threat to the residential interface. Numerous large and damaging fires have occurred in this area. In June 1990, eighteen homes and one business were destroyed by a 6,600-acre wildfire that resulted in more than \$4.8 million dollars in damage. In November 2008, the "Freeway Complex Fire" destroyed 187 structures while burning 30,305 acres (13,304 acres in Chino Hills and the State Park) causing approximately 16.1 million dollars in damage. Although no structures were lost within the District, the potential existed for a devastating event. Extensive automatic and mutual aid responses are required for this wildland area. Brush inspections are conducted each year at over 300 residences requiring the clearance of flammable vegetation by May 15th. In addition, it is anticipated that emergency medical and rescue services will be required for incidents occurring in these rural areas.

Many other miscellaneous-type fires are also anticipated to occur, such as vehicle and agricultural fires.

Transportation routes are extensive throughout the Fire District. Railroad routes, two freeways, two highways, congested city streets and rural roads provide a diverse and often over-burdened transportation system throughout the Fire District. These transportation routes are frequently subject to a variety of potentially complex emergency incidents including vehicle accidents, fires, and hazardous materials related incidents, all which require emergency fire, medical and rescue services.

Two large flood control channels, subsidiary channels and creeks, and the Prado Reservoir result in potential water rescue incidents.

Disasters experienced by Southern California may include earthquakes, flooding, landslides, fire conflagrations, commercial aviation accidents, terrorism and civil unrest.

## FUND BALANCE

The Fire District has recently updated its Fund Balance Reporting Policy in conjunction with the Government Accounting Standards Board (GASB) Statement No. 54. Consistent with GASB 54, the District also adopted a Board resolution that set forth certain classifications of fund balance, as well as a minimum fund balance policy. Classifications of fund balance maintained by the District are as follows:

**NONSPENDABLE** - Not available for other purposes because these funds are inherently nonspendable, i.e. not in spendable form. Examples include prepaids and deposits on file with other agencies.

**RESTRICTED** - Externally enforceable limitations on use, imposed by law or constraints by creditors, grantors or contributors. Examples might include grant funds received for the express purpose of purchasing specific supplies or equipment, or debt covenants imposed by creditors. The District currently has no restricted funds.

**COMMITTED** - Pursuant to constraints imposed by Board resolution, committed amounts cannot be use for any purpose other than specified in the resolution, unless the Board removes or changes the specific use through resolution or ordinance. Commitments of fund balance have been set forth by Board resolution as follows:

1. **Worker's Compensation Reserve Fund** – Established at a level equal to the total estimated value of all open claims and an estimated value of incurred but not reported claims at the end of each fiscal year. Funds from this account will be drawn-down to pay significant expenses against a particular workers' compensation claim file such as a single invoice in excess of \$50,000 and/or a lump sum payment when a claim is closed by way of Compromise and Release.
2. **Equipment Replacement Fund** – Provides for vehicle, apparatus and major equipment replacement. Funded through the accumulation of depreciation and amortization of capital assets in the fund. Monies shall be withdrawn for the purchase of equipment replacement items.
3. **Facilities Acquisition and Maintenance Fund** – Derived from proceeds from the sale of District property, with annual fund adjustments of a 3% inflation factor. Designated for future facility acquisition, maintenance and repair.
4. **Compensated Absences Fund** – Established at a level equal to 33% of employee accrued leave balances. Funds from this account will be drawn-down to pay-off accrued leave balance(s) due to an employee upon separation when the value of the leave accruals for a specific employee is \$50,000 or above.

5. **Emergency Contingency Fund** – Established at a level equal to two (2) months of the District’s approved expenditure budget. Funds may be utilized for emergency operating purposes in the event of the declaration of a local, state or federal state of emergency.

**ASSIGNED** – Amounts that are constrained by the District’s intent to be used for specific purposes, but are neither restricted nor committed. Examples of assigned fund balance include:

1. **Continuing Budget Appropriations** – Balance of multi-year funding requirements for approved projects or other expenditures.
2. **Budget Transfers for Revenue Shortfalls** – Amount to be transferred from fund balance to cover a projected budget deficit, if applicable, in the following fiscal year.

**UNASSIGNED** – Excess amounts not otherwise classified, to include:

1. **Minimum Fund Balance** – As per policy, the District maintains a general contingency reserve fund equal to three (3) months of the District’s approved expenditure budget.
2. **All Other** – All other funds not otherwise classified.

## 2011-2012 Final Budget

### Glossary of Terms

---

---

**Account** - A formal record that represents, in monetary units, resources, claims to resources, transactions or other events that result in changes to those resources and claims.

**Accounts Payable** - Amounts owed for goods or services.

**Accounts Receivable** - Amounts due to CVIFD.

**Asset** - A financial resource, including cash, accounts receivable, and deposits or prepayments.

**Budget** - Financial plan that serves as an estimate of future revenues and expenditures.

**Depreciation** - Depreciation reflects the wear and tear on a capital asset over its useful life. CVIFD utilizes the straight line method of depreciation. Front line apparatus is depreciated over 15 years, while equipment is depreciated over 5 years.

**Expenditure** - Payment, either in cash, by assuming a liability, or by surrendering an asset.

**Fiscal Year** - Period of 12 consecutive months chosen by an entity as its accounting period, which may or may not be a calendar year. CVIFD's fiscal year ends June 30.

**Fixed (Capital) Asset** - Any tangible asset with a life of more than one year, used in an entity's operation.

**Fund Accounting** - Method of accounting and presentation whereby assets and liabilities are grouped according to the purpose for which they are to be used. Generally used by government entities and not-for-profits.

**Fund Balance** - The difference between assets and liabilities. The components of fund balance include: restricted, reserved (designated) and undesignated (unrestricted). Restricted fund balance includes those funds that are externally restricted, generally by law, statute or contract. Reserved or designated fund balance includes those funds that are set aside by Board action, resolution or policy. Undesignated or unrestricted funds are generally available for future non-specific spending or emergency use.

**General Fund** - Because CVIFD provides only fire protection services, all resources are accounted for in a single general fund.

### Glossary of Terms

---

---

**Generally Accepted Accounting Principles (GAAP)** - Conventions, rules, and procedures necessary to define accepted accounting practice at a particular time. The highest level of such principles are set by the Financial Accounting Standards Board (FASB).

**Governmental Accounting Standards Board (GASB)** - Entity that has authority to establish standards of financial reporting for all units of government.

**Liability** - Debts or obligations owed by one entity (debtor) to another entity (creditor) payable in money, goods, or services.

**Long-Term Debt** - Debt with a maturity of more than one year from the current date.

**Modified Accrual Basis** - Recognizes revenues when when they becomes both measurable and available to finance expenditures of the current period. Expenditures are recognized when the fund liability is incurred.

**Post-Retirement Benefits** - Pensions, health care, life insurance and other benefits that are provided by an employer to retirees, their dependents, or survivors.

**Projection** - Prospective financial statements that include one or more hypothetical assumptions.

**Revenues** - Sales of products, merchandise, and services; and earnings from taxes, interest, dividends and rents.

**Short-Term** - Current; ordinarily due within one year.

**Tax** - Charge levied by a governmental unit on income, consumption, wealth, or other basis.
